

14B035 - Molecular Plant Sciences-Basic Research

Fridays 11:15-13:00 in Room 0019 (Sciences III)

Coordinators: T. Fitzpatrick (Theresa.Fitzpatrick@unige.ch) and R. Ulm (Roman.Ulm@unige.ch)

24.09.2021	Michael Hothorn: Plant membrane signal transduction I
01.10.2021	Michael Hothorn: Plant membrane signal transduction II
08.10.2021	Yamama Naciri: A population genetics insights into plant speciation
15.10.2021	- (<i>Dies academicus</i>)
22.10.2021	Luis Lopez-Molina: Control of seed germination I
29.10.2021	Luis Lopez-Molina: Control of seed germination II
05.11.2021	Mathieu Perret: Phylogenetic insights on plant diversification
12.11.2021	Teresa Fitzpatrick: Micronutrients and their importance to plants I
19.11.2021	Teresa Fitzpatrick: Micronutrients and their importance to plants II
26.11.2021	Roman Ulm: Plant photomorphogenesis I
03.12.2021	Roman Ulm: Plant photomorphogenesis II
10.12.2021	Marie Barberon: Plant nutrition and root development I
17.12.2021	Marie Barberon: Plant nutrition and root development II
24.12.2021	-
